

# Ultimate Spiral Vegetable Slicer

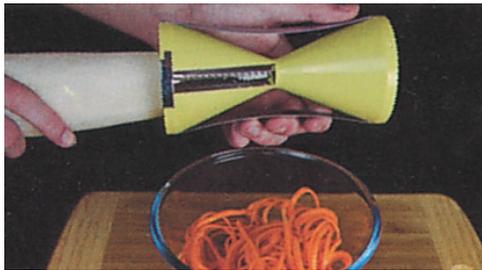

## Operating Instructions

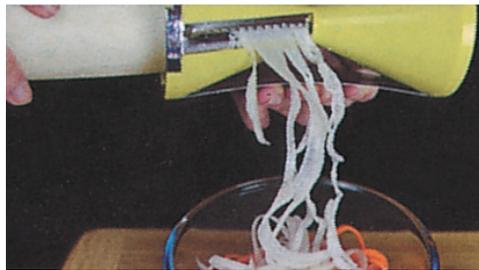

- A. Spiralizer
- B. Finger Guard Cap
- C. Installed Blade
- D. Installed Blade (Not Shown)
- E. Additional Blades

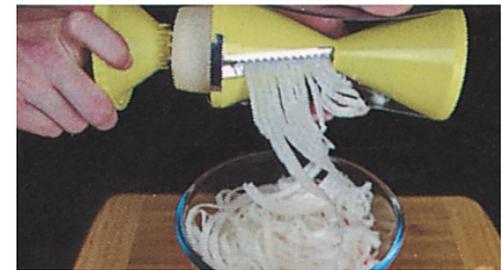

## HOW TO USE:

Place the vegetable straight in the middle of the cone, making sure it does not lean heavily toward any particular side.

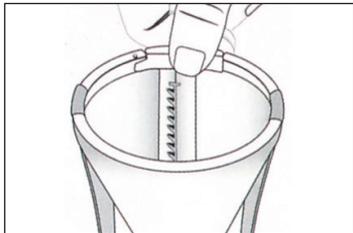

Twist the vegetable into the cone with a consistent forward force.

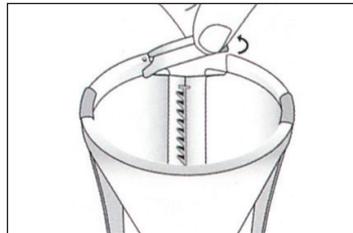

Use the included safety cap when the vegetable gets shorter to protect your finger and minimize your vegetable wastage.

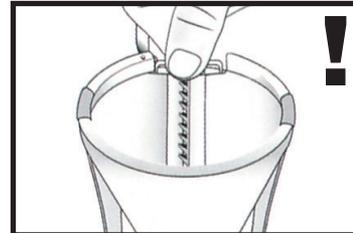

## CHANGING THE BLADES:

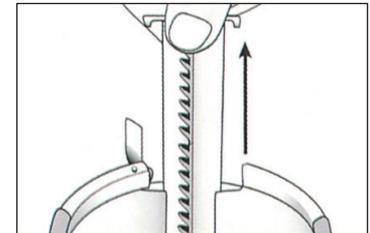

Hold the plastic clip with your fingers as shown above.

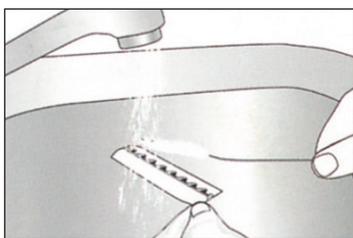

Move the plastic clip outward to open it.

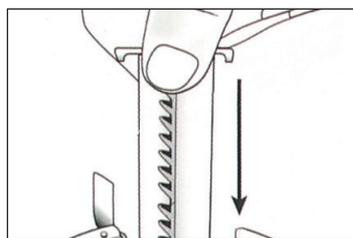

**Very carefully hold the top of the blade with your fingers without touching the teeth of the blade. Do not grab the teeth of blade with finger.**

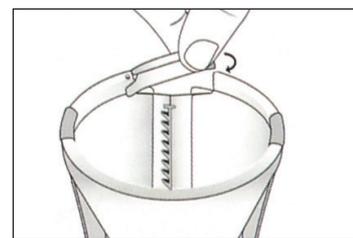

Pull the blade out of the blade slot.

(Optional) Wash the blade under warm water. Use a cleaning brush to clean between the teeth if necessary.

Insert desired blade into the blade slot making sure the cutting side is facing inward.

Move the plastic clip inward until it snaps back into place.
