

## Instructions:

Take note of the raised icon on each lid, indicating the blade function: squares for dicing, stripes for slicing.

Position the cube so the desired function is on top. Make sure the clear bin is pointing upwards.

Lift the lid and place peeled clove on the blade and press down firmly. Processed garlic will fall into the bin.

Pop the grid and blade out of the frame separately for easy cleaning. All parts are dishwasher safe but hand washing is recommended.
